Program Maps for Natural Sciences, Mathematics, and Engineering (https://programmap.csub.edu/academics/interest-clusters/4e942a6e-b8e4-4b60-a1ae-334235acc581/)

Program Description

Computer Science is a constantly evolving discipline. To quote the Association for Computing Machinery, "Computer Science is not simply concerned with the design of computing devices; nor is it just the art of numerical calculation. Computer Science is concerned with information in much the same sense that Physics is concerned with energy; it is devoted to the representation, storage, manipulation, and presentation of information in an environment permitting automatic information systems."

The Computer Science major at CSUB has three pathways that lead to a B.S. in Computer Science. The traditional Computer Science program follows the guidelines recommended by the Association for Computing Machinery (ACM). The Computer Information Systems concentration is intended for training application programmers or for those who wish to apply computer science in another discipline. The Information Security concentration is intended for students who wish to pursue a career in information assurance and cyber security, either with government agencies or with industry. Students in the three pathways will take different advanced courses of their choice. A Computer Science minor is also offered.

The Computer and Electrical Engineering and Computer Science Department moved into a new building in Fall 2008. The department administers its own local area network which includes multiple Unix/Linux servers, two software programming labs, a walk-in lab/tutoring center, one advanced workstation lab, an isolated network lab, an AI/visualization lab, a DSP/communications lab, one digital electronics hardware lab, a power systems/electronics lab, and a robotics/control systems lab. There is also a departmental library/major study room available to students.

An important goal of the department is to enable students to work much more closely with faculty than they would be able to at larger universities.

A detailed description of student learning goals and objectives can be found at https://www.cs.csub.edu/abet/.

Academic Regulation

A grade of C- is the minimal grade acceptable for progression in the CMPS 2010 Programming I: Programming Fundamentals and CMPS 2020 Programming II: Data Structures and Algorithms sequence.

Program Requirements

This concentration is intended for students who wish to pursue a career in information assurance and cyber security, either with government agencies or with industry.

Information Security Elective Courses

Select 12 units from the following: 1

- CMPS 2650 | Linux Environment and Administration |
- CMPS 3560 | Artificial Intelligence |
- CMPS 3650 | Digital Forensics |
- CMPS 4450 | Data Mining and Visualization |
<table>

**Global Intelligence and National Security (GINS) Required Cognate Courses**

Select one GINS Analytical Tools course from the following: 2

- CRJU 3500 Profiling Violence
- ECON/MIS 3200 Introduction to Geographic Information Systems
- GEOI 4050 GIS for Natural Sciences
- MIS 4100 Information Security and Privacy
- SOC 4010 Social Changes and Social Movements

Select 8-9 units of GINS upper division focus area courses from the following: 3

- CHIN 1000 Chinese I
- CHIN 1001 Chinese I Lab
- CHIN 1010 Chinese II
- CHIN 1011 Chinese II Lab
- CRJU 4340 Terrorism
- HIST 3150 Twentieth-Century America
- HIST 3310 Revolutions in Latin America
- HIST 3410 The Rise of Islamic Civilization, 570-1258
- HIST 3420 Science, Technology, and Engineering in Islamic History, 758-1406
- HIST 3490 Modern China
- HIST 4510 The History of European Empires 1500-2000
- PLSI 3040 International Relations
- PLSI 3320 Government and Politics of China
- PLSI 3330 Global Security Issues
- PLSI 3340 Government and Politics of Latin America
- PLSI 3350 Government and Politics of the Middle East
- PLSI 3380 Politics of International Terrorism
- PLSI 3610 American Foreign Policy
- PLSI 3620 Media, Propaganda, and Public Opinion
- PLSI 3630 Political Psychology
- SOC 4020 Globalization and Social Change

**Major Subtotal** 86-88

**Additional Units Needed Towards Graduation** 0-2

**Total Units** 118-122

---

1. At least one course must be at the 4000-level.
2. If a Geographical Information Systems (GIS) Tools course is not available, CMPS 3480 Computer Graphics, ECE 4460 Image Processing or ECE 4470 Computer Vision may be substituted for ECON 3200 Introduction to Geographic Information Systems / MIS 3200 Introduction to Geographic Information Systems, or GEOI 4050 GIS for Natural Sciences.
3. Other GINS focus area or strategic language courses may be used with the consent of a program advisor.
4. Some of the courses required for the Computer Science major also satisfy General Education requirements. Students who complete each of these courses with the appropriate grade will also satisfy the GE requirement, even if they were to change majors:
   - CMPS 4928 Senior Project II satisfies the Capstone requirement.
   - PHIL 3318 Professional Ethics satisfies UD Thematic Area C and the Computer Science Ethics requirement.
   - MATH 2510 Single Variable Calculus I or MATH 2310 Single Variable Calculus I for Engineers with a grade of C- or better satisfies Foundational Skills B4.
   - PHIL 3318 Professional Ethics satisfies GWAR
5. The SELF requirement may be met by selecting another General Education course with a SELF overlay or by taking a stand-alone course. If a student opts to take a stand-alone course for SELF, the course will add additional units to that student's general education pathway.
6. Additional Units are required to meet the 120-unit requirement for graduation. Any accepted university units may be used to meet this requirement, including stand-alone courses for SELF.

**Note:** One (1) semester unit of credit normally represents one hour of in-class work and 2-3 hours of outside study per week.
