**Program Description**

Mathematics is a unique and valuable science that is enjoyable and rewarding. The Department of Mathematics provides a collection of mathematics courses designed to challenge and stimulate all open minded and thoughtful students regardless of individual backgrounds or major interest areas. This is done by combining flexibility, applicability, and historical perspective in the design of the mathematics curriculum. Furthermore, depth of understanding and appreciation are not sacrificed to quantity; the major emphasis is upon inquiry, creativity, methods, techniques, and thought processes rather than bulk of material.

The classroom goal is to discover both the importance and beauty of mathematics by combining lectures with problem solving recitations, student presentations, writing assignments, computer experience, and any other workable approaches to learning. The Department of Mathematics at CSUB includes a discussion session in every 4-unit mathematics course. A student is encouraged to interpret and communicate mathematically with others, to follow self-direction and in-depth study, and to investigate the interplay of mathematical concepts. A teacher acts as a resource person, stresses the spirit and point of view of mathematics, and provides for feedback of the relative value of classroom activities.

Upon completion of any mathematics course, students are better prepared to be participants in a highly technological, scientifically complex environment. From a subjective point of view, they should have an improved grasp of the art and beauty of rational reasoning and discourse both as an observer and a participant. From an objective point of view, they should have acquired new skills which, alone or in combination with others, will enhance both an understanding of and performance in the scientific world. A detailed description of student learning goals and objectives can be found at www.csub.edu/irpa/_files/pdfs/assessment-plans/bs-mathematics-slos.pdf (https://catalog.csub.edu/academic-degrees-programs/undergraduate-majors/mathematics-bs-applied-mathematics-concentration/www.csub.edu/irpa/_files/pdfs/assessment-plans/bs-mathematics-slos.pdf)

**Program Requirements**

Includes courses that link mathematics with the sciences. This concentration prepares students for a career or advanced studies in the mathematical sciences.

**Major Requirements**

- MATH 2222 Introduction to Mathematical Computing 4
- MATH 2510 Single Variable Calculus I 4
- MATH 2520 Single Variable Calculus II 4
- MATH 2610 Linear Algebra I 4
- MATH 3000 Mathematical Foundations 4
- MATH 3200 Probability Theory 4
- MATH 3520 Analysis I 4
- **Applied Mathematics Concentration**
  - MATH 2531 Multivariable Calculus 4
  - MATH 2532 and Vector Calculus 4
  - MATH 2533 Multivariable and Vector Calculus 4
  - MATH 2540 Ordinary Differential Equations 4
  - MATH 3300 Numerical Analysis 4
  - MATH 3500 Complex Variables 4
  - MATH 3620 Abstract Algebra I 4
  - MATH 4610 Linear Algebra II 4
  - MATH 4908 Senior Seminar 4
  - MATH 3310 Discrete Mathematical Modeling 4
  - MATH 4300 Applied Cryptography 4
  - MATH 4500 Partial Differential Equations 4

**Major Subtotal** 60-62

**Additional Units Needed Towards Graduation** 11-13

**Total Units** 118-122

1 A modification to the standard GE program has been approved that allows the possibility of satisfying some GE requirements through the major. MATH 1030 College Algebra and Trigonometry, Dual Credit Program, MATH 1040 Precalculus I and II Combined, MATH 1050 Precalculus I, MATH 1060 Precalculus II, MATH 2010 Calculus for the Biological and Chemical Sciences I, MATH 2020 Calculus

2 The SELF requirement is met by completing a Lower Division Area B, C, or D course with a SELF component.
